promote total relaxation.

The beauty of Docteur Renaud's Hot Shingles is that each collection is created fresh for each new client; there's no re-using of shingles as they are discarded after the treatment. The heat created by Docteur Renaud's Hot Shingles mixture is also carefully formulated to provide the optimal temperature and benefits needed for the treatment. Since the therapist creates the Hot Shingles in their hands, the client can rest assured that the shingles will be hand-hot and not uncomfortable on the skin.

Other benefits for salons and spas include the fact that no hot stone heaters are required, therefore no investment in equipment and maintenance contracts for their regular upkeep. Additionally, there's no waiting around for stones to heat, no risk of burning a client's skin and the often-experienced problem of cleaning the stones properly between treatments, is totally avoided. With Docteur Renaud's Hot Shingles you'll be providing your clients with a highly efficacious, ultra-relaxing treatment that uses the most hygienic of methods and provides your clients with the pleasurable salon experience they expect.
